

Om Shanti and greetings of love on this auspicious day for all of us.

On the 18th of January 2018, the Global IT team launched a new mobile App.

The App is called BeeZone and it provides tools and techniques for people to relax, refocus, unwind and move into a positive space - a Zone where they can just Be.

This app has been developed as a tool especially to serve those from the IT community, but the App is very neutral and has a number of features including traffic control. It is appropriate for anyone to use, from professionals to kids, also including BKs. We hope you like it and find it useful in serving your local communities.

Attached are two posters which we would like you to put on your notice board for everyone to see. The second one, which is simpler, can be used to distribute via Whats App etc.

In Baba's yaad,

Global IT team
